SUMMARY

I am a dedicated Network Engineer with strong expertise in monitoring, maintaining, troubleshooting and optimizing networks. I am proficient in TCP/IP and have solid working knowledge of network protocols like MPLS, GPON, DWDM and system configurations. I possess excellent communication and documentation skills which makes me capable of generating clear and comprehensive technical documentation, including network diagrams and procedures. With strong attention to detail, effective collaboration, and customer-facing abilities, I contribute to the success of my team by helping to reduce outage durations.

SKILLS

- Network monitoring, Customer Support, Network Documentation, Incident Management, TCP/IP, Network Infrastructure Troubleshooting, Data Center Operations, Routing and Switching, MPLS/GPON/DWDM, Fiber Optics

EXPERIENCE

CSQUARED

Apr 2024 - Present

NETWORK OPERATIONS ENGINEER

Accra, Ghana

- Responsible for monitoring network performance using tools such as Nokia NFMP, Cacti and Adva ensemble.
- Troubleshoot service outages and resolved customer issues, ensuring timely restoration of services
- I monitor and maintain network and software components using established guidelines, enhancing system performance and stability
- I ensure the reliability of data center operations by monitoring and maintaining cooling systems for optimal performances and performing weekly inspections of the backup generator to guarantee power continuity during outages.
- Maintained detailed documentation on support tickets and troubleshooting processes, facilitating efficient incident management
- I am responsible for coordinating with vendors and internal field teams to perform troubleshooting and maintenance of equipment at various sites.
- Resolved problems with network devices at customer sites, ensuring smooth operation and customer satisfaction
- Tracked deployed networking hardware inventory, including serial numbers, warranty information, and vendor support expiration dates, ensuring accurate records for maintenance and support, which improved operational efficiency and reduced downtime
- I am responsible for upgrading systems to their latest versions to improve performance, compatibility and security.
- I am responsible for replacing faulty or outdated hardware on customer premises and various organizational router hubs and POPs, enhancing network reliability and uptime.

SEATEC TELECOM SERVICES LIMITED

Nov 2022 - Mar 2024

NETWORK/TELECOM ENGINEER

Tema-Ghana

- Assisted in designing and implementing network infrastructure by configuring switches, routers, and access points, enhancing network performance and reliability
- Collaborated with teams to plan and implement network upgrades and new deployments, ensuring smooth transitions and improved network capabilities
- Documented network configurations, procedures, and troubleshooting guides, facilitating knowledge sharing and efficient problem-solving
- Provided technical support and training to end-users and colleagues on new and existing solutions, resulting in improved user proficiency and reduced support requests
- Conducted routine maintenance and resolved faults at various customer organizations across Ghana, utilizing TCP/IP protocols to ensure network reliability and minimize downtime

EDUCATION

HO TECHNICAL UNIVERSITY

Jan 2021 - May 2022

Bachelor of Technology (BTECH), Information and Communication Technology

HO, Ghana

Ho Technical University

Jan 2021 - May 2022

Higher National Diploma, Information and Communication Technology

HO, Ghana

CERTIFICATIONS

- **Certificate in Cisco routing and switching: Open Labs Ghana - March 2024**
